RE: Amendment to 401 Water Quality Certification Order No. 10471 for U.S. Army Corps of Engineers Reference No. NWS-2012-1320-WRD for the Drainage District 23 Ditch Alterations, in drainage ditches associated with Hylebos Creek, Cities of Tacoma and Fife, Pierce County, Washington

Dear Mr. Rettmann:

Enclosed is an amendment to Water Quality Certification Order No. 10471, issued on March 12, 2014, for the above project.

The Port of the Tacoma submitted revised JARPA plans and supplemental information in an e-mail request to Ecology on September 30, 2014, to modify the 401 Certification.

The purpose of the amendment is to modify the project description to authorize an additional site access road at the general location of 12th Street and 46th Street. In order to reflect the additional work authorized by the amendment to Order No. 10471, we are providing a strikeout version of the 401 Certification for your information.

All other conditions of Water Quality Certification Order No. 10471 remain in effect. If you have any questions, please contact Lori Kingsbury at 360-407-6926. The enclosed Amendment may be appealed by following the procedures described in the Amendment.

Sincerely,

Perry J Lund, Unit Manager
Shorelands and Environmental Assistance Program
Southwest Regional Office

IN THE MATTER OF GRANTING) **ORDER No. 10471, First Amendment**
A WATER QUALITY) **Corps Reference No. NWS-2012-1320-WRD**
CERTIFICATION TO)
The Port of Tacoma)
In accordance with 33U.S.C. 1341)
(FWPCA §401), RCW 90.48.120, RCW)
90.48.260 and Chapter 173-201A WAC)

TO: Port of Tacoma
Attn: Mr. Mark Rettmann
PO Box 1837
Tacoma, WA 98401-1837

On March 12, 2014 the Washington State Department of Ecology (Ecology) issued a 401 Water Quality Certification to the Port of Tacoma for the above-referenced project pursuant to the provisions of 33 U.S.C. 1341 (FWPCA § 401).

Ecology received a request on September 30, 2014, to modify the project description to authorize an additional site access road. The entrance is being constructed for construction access to the site, but will likely be incorporated into a future development of the site as a permanent entrance.

Administrative Order No.10471 dated March 12, 2014, is hereby amended as follows:

The project description is amended to authorize the additional activities:

- Construct a new access entrance at approximately 12th Street and 46th Street at the project location;
- Install a pipe no more than 96 linear feet long in the 12th Street Ditch for the construction road crossing which includes the installation of a 2-foot diameter culvert, manhole and connection to an existing stormwater outfall pipe along 12th Street; and
- Remove 15 cubic yards of sediment from 125 linear feet of the 12th Street Ditch, east and west of the new crossing.

No other conditions or requirements of the above-mentioned order are affected by this amendment.

Ecology retains continuing jurisdiction to make modifications hereto through supplemental orders, if it appears necessary to further protect the public interest.

Failure to comply with this amended Order may result in the issuance of civil penalties or other actions whether administrative or judicial, to enforce the terms of this amended Order.

YOUR RIGHT TO APPEAL

You have a right to appeal this Amendment to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Amendment. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001 (2).

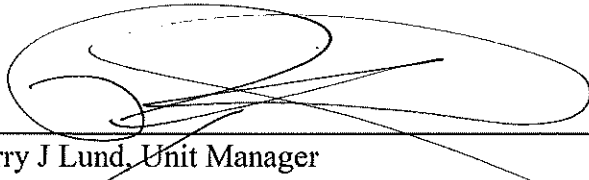

To appeal you must do all of the following within 30 days of the date of receipt of this Amendment:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.

DEPARTMENT OF ECOLOGY

IN THE MATTER OF GRANTING A)	ORDER # 10471
WATER QUALITY)	Corps Reference # NWS-2012-1320-WRD
CERTIFICATION TO)	For the Drainage District 23 Ditch Alterations, in
Port of Tacoma)	ditches associated with Hylebos Creek, Tacoma
in accordance with 33 U.S.C. 1341)	and Fife, Pierce County, Washington
(FWPCA § 401), RCW 90.48.120, RCW)	
90.48.260 and Chapter 173-201A WAC)	

TO: Port of Tacoma
ATTN: Mr. Mark D. Rettmann
PO Box 1837
Tacoma, WA 98401-1837

On December 18, 2012 the Port of Tacoma submitted a Joint Aquatic Resource Permit Application (JARPA) to the Department of Ecology (Ecology) requesting a Section 401 Water Quality Certification. Project revisions were submitted to Ecology on April 30, 2013. A joint public notice for a proposed water quality certification from Ecology was distributed by the U.S. Army Corps of Engineers for the above-referenced project pursuant to the provisions of Chapter 173-225 WAC on March 15, 2013.

The project consists of the following elements:

- The installation of a culvert across Drainage District 23 Ditch (DD 23, also referred to as the Fife Ditch);
- Filling the 8th Street East roadside ditches to provide site access to prepare Parcel 14 for future development;
- Excavation of a stormwater storage basin on the left bank of DD 23;
- **Construct a new access entrance at approximately 12th Street and 46th Street at the project location;**
- **Install a pipe no more than 96 linear feet long in the 12th Street Ditch for the construction road crossing which includes the installation of a 2-foot diameter culvert, manhole and connection to an existing stormwater outfall pipe along 12th Street; and**
- **Remove 15 cubic yards of sediment from 125 linear feet of the 12th Street Ditch, east and west of the new crossing.**

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

First Amendment changes are reflected in RED.

*Order No. 10471, Corps No. NWS-2012-1320-WRD
Drainage District 23 Ditch Alterations
March 12, 2014
Page 2 of 11*

Project work includes the installation of a concrete box culvert, 80 feet long, 16 feet wide, and 7 feet tall, in the Fife Ditch at 8th Street. The culvert installation would include the excavation of up to 576 cubic yards of soils and placement of up to 625 cubic yards of quarry spall, crushed bedding, and structural backfill. A temporary flow diversion system will be installed to bypass flow in the Fife Ditch to isolate the in-water construction area.

To accommodate current access and further roadway widening, 8th Street East road-side drainage ditches will be filled along 230 linear feet on the north side and 330 linear feet on the south side of the street. The street will be excavated (up to 2,010 cubic yards), filled (up to 2,515 cubic yards) and graded to create the road prism for future roadway widening.

A stormwater storage basin will be excavated in an upland area of Parcel 14 and connected to the Fife Ditch. The proposed stormwater storage basin would provide increased capacity of the Fife Ditch to meet the proposed future development which includes the extension of State Route 167.

Approximately 92.6 acres of upland grading will occur on Parcel 14 to prepare the site for future development.

This project is associated with the proposed site preparation of Parcel 14. The location of the 8th Street East Culvert is on the following three parcels: 5200 12th Street, Tacoma; 5100 8th Street East, Tacoma; and 1010 54th Avenue East, Fife, Pierce County, Washington. The location of the stormwater storage basin portion of the project is on the following parcels: 5000 4th Avenue, 5200 4th Street, and 5200 Marshall Avenue, Tacoma, Pierce County, Washington. All portions of the project are located within Section 1, Township 20 North, Range 3 East, WRIA 10, Puyallup-White Watershed.

AUTHORITIES:

In exercising authority under 33 U.S.C. 1341, 16 U.S.C. 1456, RCW 90.48.120, and RCW 90.48.260, Ecology has examined this application pursuant to the following:

1. Conformance with applicable water quality-based, technology-based, and toxic or pretreatment effluent limitations as provided under 33 U.S.C. Sections 1311, 1312, 1313, 1316, and 1317 (FWPCA Sections 301, 302, 303, 306 and 307);
2. Conformance with the state water quality standards contained in Chapter 173-201A WAC and authorized by 33 U.S.C. 1313 and by Chapter 90.48 RCW, and with other applicable state laws; and
3. Conformance with the provision of using all known, available and reasonable methods to prevent and control pollution of state waters as required by RCW 90.48.010.

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

First Amendment changes are reflected in RED.

Drainage District 23 Ditch Alterations

March 12, 2014

Page 3 of 11

WATER QUALITY CERTIFICATION CONDITIONS:

Through issuance of this Order, Ecology certifies that it has reasonable assurance that the activity as proposed and conditioned will be conducted in a manner that will meet the applicable water quality standards and other appropriate requirements of state law. In view of the foregoing and in accordance with 33 U.S.C. § 1341, RCW 90.48.120, RCW 90.48.260, Chapter 173-200 WAC and Chapter 173-201A WAC, water quality certification is granted to the Applicant subject to the conditions within this Order.

Certification of this proposal does not authorize the Applicant to exceed applicable state water quality standards (Chapter 173-201A WAC), ground water standards (Chapter 173-200 WAC) or sediment quality standards (Chapter 173-204 WAC). Furthermore, nothing in this certification shall absolve the Applicant from liability for contamination and any subsequent cleanup of surface waters, ground waters or sediments occurring as a result of project construction or operations.

A. General Conditions:

1. For purposes of this Order, the term “Applicant” shall mean the Port of Tacoma and its agents, assignees and contractors.
2. For purposes of this Order, all submittals required by its conditions shall be sent either by regular mail to Ecology’s Southwest Regional Office, Attn: Federal Permit Manager, SEA Program, P.O. Box 47775, Olympia, WA 98504-7775 or via e-mail to loch461@ecy.wa.gov. Any submittals shall reference Order No. **10471** and Corps No. **NWS-2012-1320-WRD**.
3. Work authorized by this Order is limited to the work described in the initial JARPA received by Ecology on December 18, 2012 and as revised in the subsequent submittal received on April 30, 2014. The Applicant will be out of compliance with this Order and must reapply with an updated application if the information contained in the JARPA is voided by subsequent changes to the project not authorized by this Order.
4. Within 30 days of receipt of an updated JARPA Ecology will determine if the revised project requires a new Water Quality Certification and Public Notice or if a modification to this Order is required.
5. This Order shall be rescinded if the U.S. Army Corps of Engineers does not issue a Section 404 permit.

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

First Amendment changes are reflected in RED.

Order No. 10471, Corps No. NWS-2012-1320-WRD

Drainage District 23 Ditch Alterations

March 12, 2014

Page 4 of 11

6. Copies of this Order shall be kept on the job site and readily available for reference by Ecology personnel, the construction superintendent, construction managers and lead workers, and state and local government inspectors.
7. The Applicant shall provide access to the project site and all mitigation sites upon request by Ecology personnel for site inspections, monitoring, necessary data collection, and/or to ensure that conditions of this Order are being met.
8. Nothing in this Order waives Ecology's authority to issue additional orders if Ecology determines that further actions are necessary to implement the water quality laws of the state. Further, Ecology retains continuing jurisdiction to make modifications hereto through supplemental order, if additional impacts due to project construction or operation are identified (*e.g.*, violations of water quality standards, downstream erosion, etc.), or if additional conditions are necessary to further protect water quality.
9. The Applicant shall ensure that all appropriate project engineers and contractors at the project site have read and understand relevant conditions of this Order and all permits, approvals, and documents referenced in this Order. The Applicant shall provide Ecology a signed statement (see Attachment A for an example) from each project engineer and contractor that they have read and understand the conditions of this Order and the above-referenced permit, plans, documents, and approvals. These statements shall be provided to Ecology before construction begins at the project site.
10. This Order does not authorize direct, indirect, permanent, or temporary impacts to waters of the state or related aquatic resources, except as specifically provided for in conditions of this Order.
11. Failure of any person or entity to comply with this Order may result in the issuance of civil penalties or other actions, whether administrative or judicial, to enforce the terms of this Order.

B. Water Quality Conditions:

1. This Order does not authorize temporary exceedances of water quality standards beyond the limits established in WAC 173-201A-200(1)(e)(i).
2. The Applicant shall submit a Water Quality Monitoring and Protection Plan (WQMPP) to Ecology's Federal Permit Manager (per Condition A2, above) for **review and approval** at least 20 days prior to any in - and - over-water work activities. Work is not authorized to begin until approval is received. The WQMPP shall include at a minimum, the following information:
 - a. The name(s) and contact information of the person or firm responsible for on-site monitoring and reporting;

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

Drainage District 23 Ditch Alterations

March 12, 2014

Page 5 of 11

- b. The Best Management Practices (BMPs) and procedures to be used to protect water quality during the specific segments of work activities;
 - c. A water sampling plan for turbidity that includes the sampling method and frequency;
 - d. A map of the sample locations that shall include, but are not limited to: background (outside the area of influence), half the distance to the point of compliance, and at the point of compliance, unless otherwise approved by Ecology
 - e. A contingency plan that includes the steps to be taken if monitoring results indicate that an exceedance has occurred.
3. Ecology must approve, in writing, any changes or additions to the WQMPP.
4. Results of the water quality monitoring shall be documented in a report and submitted weekly to the Federal Permit Manager per condition A.2. (Refer to Attachment B for an example.) The Report must include the following monitoring information: Date, time, monitoring location, turbidity observations, name of personnel doing the monitoring, and the weather conditions at the time of the monitoring.
5. If water quality exceedances are observed outside the point of compliance, work shall cease immediately and the Applicant or the contractor shall assess the cause of the water quality problem and take immediate action to stop, contain, correct the problem and prevent further water quality turbidity exceedances. If an exceedance occurs, the Applicant shall follow the procedures below:
 - a. Notification of exceedances: Notification of exceedances shall be made to Ecology within **24 hours of occurrence**. Notification shall be made with reference to Order # 10471, Attn: 401/CZM Federal Permit Manager by telephone at (360) 407-6926 or by e-mail at loch461@ecy.wa.gov. The Applicant shall, at a minimum, provide Ecology with the following information:
 - i. A description of the nature, extent, and cause of the exceedance.
 - ii. The period of non-compliance, including exact dates, duration, and times and/or anticipated time when the project will return to compliance.
 - iii. The steps taken, or to be taken to reduce, eliminate, and prevent a recurrence of the non-compliance.
 - iv. In addition, within five (5) days after the notification of the exceedance, the Applicant shall submit a written report to Ecology (per conditions A.2.) that describes the nature of the exceedance(s), corrective action taken and/or planned, steps taken to prevent a recurrence, photographs, and any other pertinent information;
 - b. Mitigation and/or additional monitoring may be required if the monitoring results indicate that the water quality standards have not been met.

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

Order No. 10471, Corps No. NWS-2012-1320-WRD

Drainage District 23 Ditch Alterations

March 12, 2014

Page 6 of 11

C. Timing Requirements:

This Order shall remain in effect for a period of five (5) years from the date of issuance. Continuing this project beyond the five year term of this Order will require separate certifications every five years.

D. Notification Requirements:

1. Written notification (e-mail is preferred) shall be made to Ecology's Southwest Regional Office Federal Permit Manager in accordance with condition A2, above for the following activities:
 - a. At least ten (10) days prior to the onset of in-water work in each construction season.
 - b. Within ten (10) days after completion of construction for each project season.
 - c. Immediately following a violation of the state water quality standards or any condition of this Order.
 - d. If project construction is not completed within 13 months of issuance of this Order, the Applicant shall submit a written construction status report. Status reports shall be submitted every 12 months thereafter until project construction is complete.

E. Project Specific Conditions:

General Construction

1. The Applicant shall comply with the conditions of the current Construction Stormwater General Permit (National Pollutant Discharge Elimination System - NPDES) *No. WAR-126985* issued for this project.
2. All work in and near waters of the state shall be done so as to minimize turbidity, erosion, and other water quality impacts. Construction stormwater, sediment, and erosion control Best Management Practices (BMP's) suitable to prevent exceedances of state water quality standards shall be in place at before starting clearing, filling, and grading work and shall be maintained throughout construction.
3. The Applicant must use an Ecology approved Stormwater Manual for implementation, maintenance, and operation of BMPs.
4. Within the project limits, all environmentally sensitive areas that are to be protected from disturbance shall be fenced with high visibility construction (HVF) prior to commencing construction activities. All project staff shall be trained to recognize construction fencing or flagging that identifies sensitive area boundaries.
5. The project shall be clearly marked/staked prior to commencing project activities on site. Clearing limits, travel corridors, stockpile sites, and staging areas shall be clearly marked and maintained until all work is completed. Equipment shall enter and operate within the marked clearing limits, corridors, and stockpile areas.

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

First Amendment changes are reflected in RED.

Order No. 10471, Corps No. NWS-2012-1320-WRD

Drainage District 23 Ditch Alterations

March 12, 2014

Page 7 of 11

6. Staging areas will be located a minimum of 50 feet from waters of the state, including wetlands. If a staging area must be located within 50 feet of waters of the state, then the Applicant shall provide a written explanation (with additional BMPs) and obtain approval from Ecology's Federal Permit Manager before placing the staging area within the setback area.
7. Machinery and equipment used during construction shall be serviced, fueled, and maintained on uplands a minimum of 50 feet, and where practical, 100 feet, from waters of the state including wetlands, unless otherwise approved by Ecology, in order to prevent contamination to any surface water.
8. No petroleum products, fresh concrete, lime, chemicals, or other toxic or deleterious materials shall be allowed to enter waters of the state.
9. All equipment that will operate over or within waters of the state shall be free of external petroleum-based products. Accumulation of soils or debris shall be removed from the drive mechanisms and the undercarriage of equipment prior to use. Equipment shall be inspected daily for leaks, accumulation of grease, etc. Any identified problems shall be fixed before operating over or within waters of the state.
10. Wash water containing oils, grease, or other hazardous materials resulting from wash down of equipment or working area shall not be discharged into state waters. The Applicant shall establish a separate, contained area for washing down vehicles and equipment that does not have any possibility of draining to surface waters and/or wetlands.
11. All construction debris, concrete waste material, excess sediment, and other solid waste shall be properly managed and disposed of in an upland disposal site approved by the appropriate regulatory authority.
12. Appropriate BMPs shall be implemented to minimize track-out during construction.
13. Clean Fill Criteria: The Applicant shall ensure that fill (soil) placed for the proposed project does not contain toxic materials in toxic amounts.

Potentially Contaminated Soils

14. Contaminants may be present at the proposed project site. If contamination is discovered, it must be reported to Ecology (per Condition A2, above). Contaminated soils or water may require special handling and/or disposal to avoid escaping dust, soil erosion, and water pollution during grading and construction activities.
15. If contamination is currently known or observed during construction, sampling of the potentially contaminated media must be conducted. Protective measures to isolate or remove contaminated soils shall be implemented. Contaminated soils generated during

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

Drainage District 23 Ditch Alterations

March 12, 2014

Page 8 of 11

site construction shall be managed and disposed of in accordance with state and local regulations.

16. If a Phase II site assessment is required and contamination of the soil or groundwater is readily visible, or is revealed by sampling, Ecology must be notified.

Temporary Diversion Structure and Dewatering

17. The temporary cofferdam to divert water around the work area shall be in place prior to initiation of other work in the wetted perimeter of that area.
18. The temporary diversion shall be of sufficient size, constructed of non-erosive materials, and installed to divert the entire flow through the bypass or around the isolated work area for the duration of the project.
19. The diversion system shall be designed and operated so as not to cause erosion in the channel or on the bank of the waterbody in which the work is being conducted.
20. Prior to returning water flow to the work area, all bank protection measures shall be in place.
21. Re-introduction of water into the isolated work area shall be done gradually, and at a rate not higher than the normal flow, in order to minimize the mobilization of sediments and fines.
22. Upon completion of the project, all material used for the temporary diversion shall be removed from the site.
23. Turbid dewatering water (including turbid water generated from cleaning and maintenance activities) shall not be discharged directly into waters of the state. Turbid water shall be pumped to an upland area to allow the turbid water to settle. The discharge from the upland areas shall meet water quality criteria at the point of discharge into surface waters and/or wetlands.
24. Dewatering water that is not turbid may be discharged directly to surface waters and/or wetland provided that: a) waste water containing raw concrete or other harmful material has not been in contact with the water to be discharged, and b) the water will meet **all of the water quality standards at the point of discharge.**

Concrete Work

25. Spill protection measures shall be in place prior to any concrete delivery over water.
26. All concrete shall be poured in the dry, or within confined waters not being dewatered and shall be completely cured prior to coming into contact with waters of the state.

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

First Amendment changes are reflected in RED.

Order No. 10471, Corps No. NWS-2012-1320-WRD

Drainage District 23 Ditch Alterations

March 12, 2014

Page 9 of 11

27. Uncured concrete and concrete by-products shall be completely sealed off and totally contained using sealed forms or other leak-proof containment system.
28. Concrete process water shall not enter waters of the state. Any concrete process/contact water discharged from a confined area shall be routed to a contained area to be treated and disposed of appropriately with no possible entry to waters of the state.
29. Crushed concrete shall not be used for driving surfaces.

G. Emergency/Contingency Measures:

1. The Applicant shall develop and implement a Spill Prevention and Containment Plan for all aspects of this project and shall have spill cleanup materials and an emergency call list available on site.
2. Any work that is out of compliance with the provisions of this Order, or conditions causing distressed or dying fish, or any discharge of oil, fuel, or chemicals into state waters, or onto land with a potential for entry into state waters, is prohibited. If these occur, the Applicant or Operator shall immediately take the following actions:
 - a. Cease operations that are causing the compliance problem.
 - b. Assess the cause of the water quality problem and take appropriate measures to correct the problem and/or prevent further environmental damage.
 - c. In the event of finding distressed or dying fish, the Applicant or Operator shall collect fish specimens and water samples in the affected area within the first hour of the event. These samples shall be held in refrigeration or on ice until instructed by Ecology on what to do with them. Ecology may require analysis of these samples before allowing the work to resume.
 - d. In the event of a discharge of oil, fuel, or chemicals into state waters, or onto land with a potential for entry into state waters, containment and cleanup efforts shall begin immediately and be completed as soon as possible, taking precedence over normal work. Cleanup shall include proper disposal of any spilled material and used cleanup materials.
 - e. Immediately notify Ecology's 24-Hour Spill Response Team at 1-800-258-5990 **and** within 24 hours of spills or other events to Ecology's Federal Permit Manager at (360) 407-6926 or (360) 407-6300.
 - f. Submit a detailed written report to Ecology within five (5) days that describes the nature of the event, corrective action taken and/or planned, steps taken to prevent recurrence, results from any samples taken, and any other pertinent information.

October 29, 2014 – This document shows the activities that have been amended since the original Order was issued. Therefore it is not the official certification and should only be used for informational purposes.

3. Fuel hoses, oil drums, oil or fuel transfer valves and fittings, etc., shall be checked regularly for drips or leaks, and shall be maintained and stored properly to prevent spills into state waters.
4. If at any time during work the proponent finds buried chemical containers, such as drums, or any unusual conditions indicating disposal of chemicals, the proponent shall immediately notify Ecology using the above phone numbers.

YOUR RIGHT TO APPEAL

You have a right to appeal this Order to the Pollution Control Hearing Board (PCHB) within 30 days of the date of receipt of this Order. The appeal process is governed by Chapter 43.21B RCW and Chapter 371-08 WAC. "Date of receipt" is defined in RCW 43.21B.001(2).

To appeal you must do the following within 30 days of the date of receipt of this Order:

- File your appeal and a copy of this Order with the PCHB (see addresses below). Filing means actual receipt by the PCHB during regular business hours.
- Serve a copy of your appeal and this Order on Ecology in paper form - by mail or in person. (See addresses below.) E-mail is not accepted.

You must also comply with other applicable requirements in Chapter 43.21B RCW and Chapter 371-08 WAC.
